1	(Time noted: 5:30 p.m.)
2	MR. CHAIRMAN: Will the meeting please
3	come to order?
4	Good evening. Welcome to the Nassau
5	County Bus Transit Committee. I'm Sheldon
6	Shrenkel. I'm chairman of the committee and
7	I'd like to introduce our members. And I'll do
8	that in conjunction with their acceptance of
9	the minutes of the last meeting, which we
10	should've all received by now.
11	With a show of hands and Ms. Valdez or
12	Erica, if you can help me putting the cameras
13	on our members as we introduce them, I would
14	appreciate it.
15	We have Mr. Tony Rosario.
16	MR. ROSARIO: Present.
17	MR. CHAIRMAN: We have Mr. John Duroseau.
18	MR. DUROSEAU: Present.
19	MR. CHAIRMAN: We have Mr. Joel Berse.
20	MR. BERSE: Howdy.
21	MR. CHAIRMAN: We have our counsel to the
22	committee, Mr. DiSilvio.
23	MR. DISILVIO: Good evening, Peter.
24	MR. CHAIRMAN: Ms. Falco and I believe
25	Ms. D'Agostino has told us that most likely

1 2 would not be available and told us that quite a while ago.

3 4

In any case, our agenda is an important agenda tonight.

5

6

7

8

We're going to first hear a presentation by NICE's CEO, Mr. Jack Khzouz, and he's going to update us on some important matters, particularly the service. And equally important is we will be voting on the budget for 2022-2023. And we will also be hopefully approving Title 6 report for 2022. We will be

10

9

taking those votes after the public comments.

12

11

So, with that, I'd like to introduce the

13 14

CEO of NICE Transportation, Mr. Jack Khzouz.

15

MR. KHZOUZ: Thank you, Chairman. And I want to at this point thank everyone, all the

16 17

BTC members. An important job that you've done

18

and committed to for many years and we very

19

much appreciate your service and attention to

20

the important matters that we're going to cover

21 22

We are going to cover the budget. you'll see, the budget is made up primarily of state-operated assistance funds.

23

Unfortunately, as you all know or may

24 25 today.

know, the state budget has not been finalized. It is late this year which means this budget that we're going to be voting on will be assumed. From what I understand, and reading, doing a lot of reading, and my contacts in Albany, the budget isn't being hung up because of financial matters, it's because hung up because of policy. So, we don't anticipate any changes to the operating budget.

With that, let's jump in but I wanted to make that statement before we start so we understand where we were.

We're going to start with our service hours. So, the 2022 operating service hours is as follows: For Paratransit, you can see in 2021, we offered 149,000 revenue hours. This year, we're projecting to offer 170.7 revenue hours. Again, Paratransit is based on demand. So, as demand grows, so will the service hours.

The 169.7 pretty much represents an 80 percent return to normal, pre-pandemic levels. That's our assumptions for the end of the year. As you can see, it's a fairly large increase and we continue to offer Paratransit to all those clients that need that lifeline

service.

Fixed route very happy to report for 2021, we logged in 807,500 revenue hours -- that should say 2022 actually -- shows that we're going to be logging in 885,850 hours, so about a 10 percent increase over the previous year. So, the first slide gives it away. We are planning for a service increase for this year happily and I'm very happy to report that.

So, let's break that down in how this gets done.

Here's our operating budget and you've all seen this pie chart in the past. New York
State operating assistance, because of the support of our state representatives and our local representatives, we saw a large increase this year in STOA funds. \$103 million for Nassau County makes up a large percentage of our total funding, which is fantastic. It allows us to increase service. It allows us to keep fares stable. Very, very happy to report that. Nassau County required STOA match, the 2.5 million, as shown here.

FTA CRRSAA funds, those are funds that came through the COVID support. That is used

to make up the fare box difference, the passenger revenue. Our normal passenger revenue tends to be about the 40 million, 42 million dollar range. CRRSAA makes up the difference in where we are going to presumptuously end the year and will help us throughout the next few years actually stabilize service. That's fantastic news.

Passenger revenue is projected currently at 28,600,000, a very large chunk. In most public agencies, passenger revenue makes up a much smaller percentage but that's because support of our passengers and great ridership.

And then, non-revenue use or non-user revenues which means advertising and some other lease holds that we hold on behalf of the county.

Our total budget tonight we're going to talking about is a budget of just shy of \$149 million, the largest operating budget we've ever had in Nassau County. I'm very happy to report.

So, again, our budget is broken up and our rates are broken up two different ways. We have the facilities and all the hard costs and

www.veritext.com

then we have a variable rate or rate per hour of service on the street. Our fixed fee last year was 3,846,000,000 a month. This year, it's risen a little bit to 3.9 million, almost \$4 million. We'll talk about how that happened this year in a few minutes.

Our rates are as follows: Slight increase in fixed route from \$99 to 101. On the Paratransit side we saw a little bit larger in increase 54 to \$56. Mostly that has to do with two different things. Number 1, we run diesel vehicles on the Paratransit side. Everybody has seen what's happened with diesel fuel. That's the majority of the increase there. There's also an increase in our liability cost. Cost on liability insurance has gone up quite a bit across the board. On our Paratransit it's a little higher, so a slight higher increase there for our hourly rate.

Next side, please.

The operating budget breaks down as we do -- these are the high-level operating budget. Operator wages takes quite a jump. Again, that basically reflects more service hours, more operators, more overtime to get

service out on the street. It's a benefit for our dedicated frontline employees.

Maintenance wages increase slightly also.

Again, that's all based on miles traveled.

Other wages, administration, and odds and ends, you'll see a small increase there.

Fringe benefits, again, is a percentage of wages. So, you'll see an increase there.

Services, those are odds and ends outside services we contract with. There is quite an increase there and we're trying to look at some different ways to bring that down over the year. Again, it's somewhat of a percentage in some cases. We'll continue to look at that.

The big line -- the eye-popping line is fuel and lubricants. 5.9 million to 9 million expected spend this year. We just got a note from our oil contract, our lubricant oil contract. Costs are going up in the next quarter 5 times what we pay now. So, it's a huge hit. CNG is double what we normally pay. Diesel is double what we normally pay. That's a big number. That also takes into account the increase in miles that we'd be traveling this year.

Parts and repairs, a small increase there. 1 2 Other materials and supplies, there is an 3 increase there. That's part of some supply chain and inflationary issues that are 4 5 happening. We do a decrease in marketing, legal, and 6 other fees. That's good news. That just gets 7 rolled into more service on the streets. 8 9 Utilities have gone up a little bit. 10 Casualty and liability, again, more miles 11 traveled means potentially higher risk. 12 see that number expressed there. 13 Depreciation is down slightly. Corporate 14 overhead is down slightly. Margin at risk is 15 what it is. We won't make that number but we'll express it here. You'll see the total 16 come as it does. 17 18 Before I move on, are there any questions 19 from the team? 20 MR. BERSE: How did that marketing line go 21 down such an amount? What's different? 22 MR. CHAIRMAN: It's marketing, legal, and other fees. Marketing makes up about 23

20 percent of that total. Legal fees makes up

the majority. There are some other fees that

24

are rolled in there also. We have been pretty aggressive in the way we take in-house legal issues instead of using outside counsel and it's paid off well.

Additionally, it does help to have a union relationship that's very, very positive. We really have worked very, very well with labor and those fees goes down as we need tap into outside legal. We haven't had to do that.

MR. BERSE: Is depreciation because the vehicles are newer?

MR. KHZOUZ: Yes, correct.

MR. BERSE: I'm done.

MR. DUROSEAU: I'm sorry, Mr. Khzouz.

My problem here -- it's not a problem.

Since we're talking about newer vehicle, I like to understand why parts and repair drop that much since our fleet is supposed to be newer?

MR. KHZOUZ: The actual jump is only about \$100,000 parts and repairs. Normally, what we would see on a fleet this size, you would see quite a bit more when we increase the mileage that much more. The actual jump is a smaller percentage than our mileage jump, so that's why that reflects there. We have taken into

account the hundred new vehicles but also the cost of the other 178 older vehicles on the road has also increased. It kind of offsets itself a little bit. You would expect that number to be possibly a little higher again because of all of mileage, but there is an offset.

We do look at the mileage of all of our vehicles new versus the older vehicles. The older vehicles get an increase in cost per run per mile. The newer vehicles run a smaller run per mile. Again, we see our total miles increase by about 10 percent this year. That really is proportionate or a little less than we would expect.

MR. DUROSEAU: Thank you.

MR. KHZOUZ: Let's go ahead and move forward.

On the operating budget capital plan, I want to give everyone an update on what's going on, what the major highlights for capital plan is. You're going to see a couple of slides that look like an eye exam here that you're not going to be able to read. This is the high level and the major customer facing things that

1 you'll see on the plan.

25

Final phase remodel interior Rosa Parks HTC, that's Hempstead Transit Center, Rosa Parks Hempstead Transit Center. This final phase, which will start a little later this spring, will include new A.D.A. sliding doors, new air curtains, new Terrazzo floor, new wall surfaces, and some new poured and stamped concrete. And then, we'll be complete with the center until the next round. That really updates the center completely. We've touched every surface. It looks great and it's really an inviting place to be. As we finish out this next quarter, we'll really be proud of the center and where it's come from.

We have 39 new fixed-route buses coming this year plus 6 electric buses. We'll talk about that on the next slide. The 39 new fixed-route buses will replace some of the older New Flyers that are in the fleet. Again, just refreshing. We'll have to keep a close on how deliveries go against supply chain issues have delayed some deliveries. We expect to receive those 39 vehicles before the end of the year. How much they'll be in service before

the end of the year is still up for debate, but we'll keep everybody abreast of how things come.

The battery electric buses and the BEB infrastructure for those buses will be procured this year. The buses are already done. The charging stations are already complete and purchased. Now, it's the infrastructure that we need to purchase. In other words, we've got to break ground and get the charging locations put into operation. We expect those functions to all happen before this side of the year.

The CNG island, the fuel island, gets an upgrade this year also, the last part of a \$12 million upgrade that we did in the CNG fueling station a few years ago. We put off doing the fuel island upgrade. The new fuel island upgrade will us to fuel buses faster and safer with a better overall cover for the weather.

So, we're excited to have that and it just adds more amenities to the facility here.

Lastly, we hope that this year we will begin the implementation of the new MetroCard replacement system called OMNY. That being said, that is not our product. That's an MTA

product and we don't control the timing on that. We have reserved some operating or capital funds to be able to get this done.

MR. BERSE: Before you move on, two questions.

The battery electric buses, what is their range and how long does it take to recharge them?

MR. KHZOUZ: A deep recharge takes a minimum of 6 hours. We'll be recharging these vehicles on the overnight. The range that that full charge and deep charge will get is anywhere from 140 to 180 miles depending on loads and temperature conditions.

So, that is more than enough to cover a full day of service.

MR. BERSE: Okay.

MR. KHZOUZ: As we move on, you'll see the details the two next pages are the actual capital plan, you know, details. Again, it's a little difficult to read, but it is all there for your approval and for you to look at.

These are all grant-funded -- a bit difficult to read, but we're managing these projects and they're all planned for this year.

24

25

Let's move on to the scorecard. These are our performance KPIs or key performance indexes that we report to the county. Our on-time performance goal, by the way, is now raised to 90 percent not 70 percent on the fixed-route For the first quarter, we had 91.35 percent. Proud to be able to say that. We want to be able to hit a consistent 92 percent before the end of the year and potentially go as far as 95 percent on time with our fixed-route fleet. That's a pretty aggressive goal. I don't know that there's another northeast system that does that. think we can do it.

Second is number of -- percentage of missed pullouts because of mechanical issues or driver shortages. Our goal is zero. In the first quarter, we had 1/10 of 1 percent missed pullouts. We have about 10,500 pullouts a month. So, 30,000 or so pullouts for the year. We had 1/10 of 1 percent missed. That doesn't mean that the bus did not complete its trip for the first time point, it just means it did not pull out of the gate on time for this location.

Accidents: We had a pretty good accident

performance for the first quarter. As a percentage of 100,000 miles, about one accident or one preventable accident per 100,000 miles. So, we made our goal there. Overall, fixed-route performance was pretty good on the KPIs.

On the Paratransit side, our called answered ratio, in other words, the amount of calls we actually answered before a hang up, 96 percent. I'm pretty proud of that.

Our on-time performance is hovering at about 84 percent, 87 for the month, but 84 percent is pretty good our on-time performance above our goal. Ideally, we would try to be at 85 percent. But, again, pretty happy with that performance. We continue to push on that.

Missed pullouts a little higher. Again, that doesn't mean anyone missed a trip or was not picked up. It just means that the pullout from our gate or depot was not on time on our performance end. It was a half of a percent.

Accidents were up a little bit from 1.2 to 1.43 per 100,000 miles traveled. We had a couple of minor dings that hit us pretty hard, mirror dings, scrapes, curb hits, that kind of

thing can throw us over. We'll continue to buckle down on that.

Our productivity has increased from 1.3 passengers per hour to 1.43 passengers per hour. I'm happy to be able to report that productivity is staying steady at about that. We are improving out on-time performance, so there's no degradation of on-time performance because we have more passengers on the vehicle.

Overall, a fairly good first quarter, still some room for improvement. But I want to make sure everybody understands these are all customer facing KPIs. That's how we plan our business with our customer ride at the center of out KPIs and we'll continue to strive for a better performance as each quarter goes on.

We'll give everybody a service update.

Again, the great news is no service decreases, all service increases. We don't have to talk about fare increases. I'm very, very happy to report the increased frequency daily and especially on weekends we're seeing riders return on weekends at a much higher rate than the daily riders. Again, that speaks to a lot of our riders who work non-traditional roles

whether it be healthcare, or hospitality, frontline workers, weekends are important. We have increased not only the frequency on a lot of routes but we've also added a span, so earlier trips and later trips.

The benefits are almost across the board on every route where we were able to add -- I'm going to pick one very quickly. The N24, two trips added on the weekdays, six trips added on Saturdays, P.M. frequency improved to 30 minutes, six trips added on Sunday, and it goes on, and on, and on. I'm not going read the whole list right at this moment but it is there for everyone to see. Very, very happy to report this. It really increases the robust nature of a healthy transit system. And, again, we're able to do this through the support of our legislators both in Albany and locally. We couldn't do it without them.

Again, very, very happy to report this.

This is something to celebrate that everyone's worked very, very hard to achieve.

Part of the service updates, I'm also glad to announce what we're calling Mini, a new service, that is a blend of the best of

micro-transit, the best of fixed-route, and the best of Paratransit. It uses a smaller vehicle to service and connect communities. It's really a community-based service. It allows people to travel -- in this case, this is the first roll out we have -- will travel from Merrick and Freeport all the way up to Lynbrook, in between connecting on the N4, the N15, the N31 and 32 so people don't have to travel back into the center of the hub of the They don't have to travel back. system. live in Merrick and have to get up to the N32, I don't need to go into Hempstead and then come back out. I could literally hail Mini and it will come. I will get on the vehicle and then go up to the 31/32. It is a revolutionary, innovative design. You see on the screen now the very first Mini area that we're going to Anything within that shaded bubble, you'll be able to get a door to door pick up and delivery in there. We'll have vehicles roaming this shaded bubble area. Once you hail it, the hail will then go to the driver, and it will respond to you how long to wait for a pick up, and then you accept the ride, and the

	Page 21
1	driver is on its way. Paratransit customers
2	can also use this to set up a ride within an
3	hour or so. They don't have to call for a
4	reservation anymore. They can use this system.
5	We're very, very excited about it.
6	The polygon or the shaded on-demand zone,
7	we will continue to watch week over week and
8	make adjustments to that polygon as we need to.
9	The greatest part about this is Mini transfers
10	to fixed routes free. You use your regular

This will be the first one. We hope to launch in early June. Stay tuned for more. A great innovation for Nassau County.

For the first 30 days, it's free for

everyone trying it. And our hope is that we'll

roll this out to sectors all over the county in

MS. RICHARDS: We would like to welcome Committee Member Mr. Reginald Benjamin has joined us.

MR. BERSE: Does this Mini have a number or it's called Mini?

MR. KHZOUZ: It's called Mini. Line 1 will be the --

> MR. BERSE: Line 1 will be the number, all

25

card.

the next 24 months or so.

1 right.

MR. KHZOUZ: We'll continue to evolve this a little bit. People will end up knowing it as Lynbrook Merrick or whatever it ends up being. The whole idea here is it will evolve over time to serve areas or riders that we don't currently identify on this map. But because of the way the data is collected, we can understand where people are hailing, and when they're hailing, and we can adjust the zone as we go forward.

Again, I want to celebrate the new vehicles coming, the 33 New Flyer CNG buses will be here hopefully before the fall.

They're the traditional orange and yellow stripe that we're all used to seeing, the real sleek look; very, very happy to see that.

We'll have one of the newest fleets on the east coast. Great for our passengers, great for our drivers, and overall, a fantastic asset to Nassau County.

On the right, you see the color scheme and new design for the electric buses. Also, New Flyer vehicles, we're very, very happy to have these coming in. And you can see the very

distinctive lightning bolt center and the NICE Bus logo repeated across the back.

Able ride has completed their online booking trip management function now. It is live to all clients. So, any client can now book and manage their trips online. They don't need to go to the telephones anymore. If they feel comfortable with online trip management, it's another option for them to use. It took us about 3 and a half, 4 months to get it online. And the hard work of everybody, it's up and running, and is being used now, and rolled out to everyone. So, very happy that's out there now, so that's fantastic for the Paratransit team.

I think if I could, Chairman, if you'd like I can go through the comments first and then we can go back to budget votes and acceptance. If anyone on the board maybe has any questions we can go to that also.

MR. CHAIRMAN: Mr. Khzouz?

MR. KHZOUZ: Yes, sir.

MR. CHAIRMAN: Can you address a little bit about since we have to vote on Title 6, I think we should discuss that before we go to

1

the public comments.

2

MR. KHZOUZ: Of course.

3

5

6

7

8

9

10

16

17

18

19

20

21

22

23

24

25

Title 6 is an FTA required document that we need to update every 3 years. It starts with a system-wide survey of at least 8,000 riders, in our case it's 8,000 riders. We hire an outside company to do this survey. survey tells us everything from socioeconomic status, to zip code, accessibility to driver's license or cars, how long they walk to a stop, why they use the bus, family income, what language they're comfortable speaking. We use that to ensure we adjust our service as the demographics change in the county. It's a very, very large survey. it's very extensive. It takes months, and months, and months to put So, that survey has to be updated together. every 3 years. Once we receive that survey, we use the data from that survey to update the Title 6 program plan.

The Title 6 program plan basically states that because we receive federal funds, we aren't required to not use any bias in the way we distribute service or assets to the people And the Title 6 plan shows that. we serve.

shows that there's a consistent level of service through minority communities, through low-income communities, and through whether it be secondary language communities, English not my first language communities, that sort of thing. It demonstrates that we don't use any bias when we roll out certain programs or plans and that there's no bias at all. The plan in front of you basically describes that. Once it's approved and accepted, then the county executive will sign it and then it will go to the FTA for their scrutiny and approval.

MR. CHAIRMAN: Were there any changes in that plan from 2001 to 2022?

MR. KHZOUZ: We have seen a shift in how people identify themselves in the Village of Hempstead. We have seen a large growth in Hispanic Latinx community members into the community, Spanish as a first or second language has grown quite a bit. We already have put plans into place and have since day one. All our communications are in English and Spanish. They're all translatable on the buses. There's language support on the vehicles and a program plan for that. On top

of that, we also see people using the vehicles differently than they used to. There's much more weekend ridership and much more late-night ridership than we saw initially 3 years ago. Some of that, obviously, is through the pandemic we see a shift. Other than that, the way the service is used and the demographics we see haven't changed much. We don't expect them to change much in the next 3 years.

MR. CHAIRMAN: If we'd like to move on at this point, I think we should hear the public comments, and you'll be reading those, I believe, and you're free to address them individually or afterward, however you deem appropriate.

MR. KHZOUZ: Certainly.

I'm going to start with -- and I'm going to butcher some of these names, I apologize, and again maybe that has something to do with my last name. Joe from Levittown, he writes happy tenth anniversary to NICE. As a regular rider, I had to share my trepidations when Nassau County MTA bus operation was privatized and there were times of budget and service cuts that justified those hears.

Since becoming a regular part of these meetings, I've seen NICE become a system we can all be proud of run by dedicated individuals who listen to their customers, and, whenever possible, act on their behalf.

Under NICE, improvements have been made throughout Nassau bus transportation system both in scheduling and infrastructure with only a minimal adverse effect on less traveled routes referring more specifically to my personal focus on Newbridge Road. While we have the lost the luxury of the N50 on weekday schedules for the N49 has been normalized to hourly service and consistent time that reduces the need to check schedules and online sources, and the additional added benefit of increased early morning and evening service. Saturday schedules still have some inconvenient 90-minute gaps, but I must say I'm both pleased and satisfied with the progress made.

That's a very night comment from Joe.

MR. CHAIRMAN: Yes, it is.

MR. KHZOUZ: Janeka writes times the Long Island Railroad is supposed to connect to NICE bus is unrealistic. Times need to be reviewed.

18

19

20

21

22

23

The morning trains are okay, but the afternoon trains to bus doesn't work. One example is the 5:38 train from Penn Station.

It reached Hempstead at 6:38 and the N35 bus to Baldwin leaves Hempstead at 6:36. I have to wait another 20 minutes for the bus. The 5:51 train from Penn Station reaches Hempstead at 6:46, so it only makes sense to take the 5:51 train, which defeats the purpose of catching the earlier train.

I totally understand that, unfortunately, every route has multiple connections. If we make one, we break another. We try to do our best. We are going to research this a little bit more but I know it's somewhat of a puzzle piece. If we make the Long Island connection, there most likely will be a broken connection somewhere else along the route and/or headways will be mixed up a little bit. We'll continue to work Long Island Railroad and try to schedule those a little bit better.

That's a really good point.

Richard writes when is NICE going to install OMNY on their buses?

Also, how is NICE going to ask the

legislators for more funding so that we can restore bus lines?

Richard, I think I talked a little bit about OMNY earlier. Again, we don't control this product. This is an MTA product. We are working with the MTA on getting a schedule done and being cooperative with them, but it's really up to them to allow us to do that. I hope it'll be soon. We all hope it'll be soon, so let's keep our fingers crossed.

As far as working with legislators, we do that now. I think we can all give everybody a high-five for all that we've accomplished for this year.

Restoring bus lines that have left us in the past, the likelihood of those coming back, probably not in the way we think they would come back. I think we have to think about solutions like Mini to be able to bridge those areas with less service. And again, I think that's the way we go for now. I like the fact that we're increasing frequency and span on the service that we do have, and that's really the way we want to go right now, and then add some service if we need to as we go forward.

Let's move on.

John Michno from Mineola writes we need more service on the N22 and N24. These lines are unreliable and there are breakdowns.

The N22 and N24 both get more service. So, yay, John; yay, everybody. Perfect.

John also writes a lot about breakdowns. He wrote a little bit about breakdowns earlier and wanted me to address that. And I'll address it now. We really don't have an issue with breakdowns. We measure them two different ways, mean distance between road failures and that means a bus has broken down and cannot finish the run, it needs to be towed, it needs to be replaced, but it has broken down completely. If we can't get another bus there within a few minutes, then that is a breakdown, and that's how we get counted against it.

I will say we are now at 12,800 miles between road failures, quite a bit higher than the average in the northeast. Again, some of that has to do with new fleet, but that's a pretty good number.

If a bus is missing, it could be a number of different things. It could be a detour, it

could be construction, it could be stuck behind a railroad crossing, it could've had an accident. It's not just a maintenance issue. We've got to keep that in mind, but I'm really proud of our reliability with only one-half of 1 percent of missed pullouts, again another great KPI to look at. It's something we should all be proud of.

Matt Camper writes is there any way that you could look at having the new ride share service available at East Meadow, especially along the corridor of Merrick Avenue where the N51 used to serve since a lot of people need service to and from the Merrick Long Island Railroad Station and NCC in East Meadow.

That's a great point. Certainly, that's an area that we're looking at for future roll-outs of Mini. That would be a perfect example of how we can backfill an area that may have had a fixed route bus in the past now has a flexible bus that can maybe even serve more people than the old system. That's a good point. We will certainly put it on the wish list as we go forward.

Andy Pollack writes as part of the new

draft plan for the Queens Bus Redesign 2.0, the MTA is planning to start the Q43 at LIJ Hospital. Is NICE planning to cut the N26 between Great Neck and Jamaica if this plan of the new draft does happen?

No. We have no plans to cut service.

We'll continue to work with the MTA to ensure that our service is complimentary, but we have no plans to cut service on the N26, so that's good news.

This is -- the next bunch of questions is from one rider advocate, Charlton D'Souza, and I'll try to read them fairly quickly. I know this is a conglomeration of input that he got from a lot of different people that he works with and we appreciate the input.

Number 1, will NICE be fully air-conditioned this summer? What temperature determines the need for air-conditioning to be inside the bus? When it's 90 degrees, on many occasions, there's no air-conditioning and the windows are closed inside the bus, which is bad especially with the COVID-19 pandemic, and the bus gets overcrowded.

Many bus drivers cannot put the

air-conditioning on because the bus will break down, including the newer buses are overheating.

I'm not sure where he gets this information but let me just clarify. On May 15, I believe, let me double check -- on, I believe, it's May 15, that's going to be our -- we're going to go with that date right now, all the air-conditioning gets turned on in all the vehicles. So, all the air-conditioning is on.

On newer buses, the driver controls the air-conditioning. So, the driver will put the air-conditioning on and off as he feels it's needed.

On the older buses, it's really kind of on all the time. So, buses don't break down if there's air-conditioning that works on it. I'm not sure where that comes. They don't overheat because of the air-conditions. We have done an extensive heating and air-conditioning program so I don't think we're going to have this problem this year. That's the shortest answer I can give you, but we can talk more offline somewhere else.

Again, May is when we turn on

air-conditioning and it's available to everybody. So, I'll wait for the complaints of buses being too cold this year. We'll see how that goes.

Are NICE bus filters inside the bus able to refresh the air inside the bus?

Yes. During the beginning of the pandemic, we upgraded all the buses to HEPA filters, all the filters to HEPA filters, so they are much more robust and they refresh the air inside the bus.

Number 3, why can't NICE run N88's bus service to Jones Beach every weekend in June from Memorial Day so the service is consistent. Some N4 Saturdays and Sundays should also start in the evening from Jones Beach and go express so the park workers and day trippers have a one seat ride to Jamaica.

So, I'll address the first part of that.

We traditionally start each service on the weekends in early June and then go to seven days during Memorial Day. That's basically because we don't -- in the past when we've run full bus service in early June to the Jones Beach facility, there are no riders on the bus.

Doesn't make great sense. It doesn't allow us to extend the service in September because we have a budget to run. Those are the kinds of things that we have to keep in mind.

Also too, what we found right now and until we get somewhere on the other side of full 100 percent return to ridership, we're not going to spend more resources on additional Jones Beach service. I would rather spend those resources on more frequency Monday through Friday and Saturday and Sunday regular service inside the county. This is important, I understand that, but I think the service — currently service levels are appropriate for ridership currently.

We'll continue to look at it. And as we go forward, maybe there will be a change as we go forward.

MR. BERSE: Just to clarify there, you said Memorial Day and I think you meant Labor Day.

MR. KHZOUZ: I mean Labor Day.

MR. KHZOUZ: Number 4, many NICE buses are filthy N6, 22, and 24. Why can't NICE bus have two cleaners at 165 Street in Jamaica.

Δ

What we're talking about -- buses get cleaned multiple times a day if they come in and out of Hempstead. The problem is when a full bus goes to Jamaica, unfortunately, there's trash left on the bus. This particular person is asking why can't we have cleaners in Jamaica come on and clean the buses as they turn around in Jamaica. That's a good point. We'll look into that to see if we can get that done especially as ridership continues to come back. It's a good point. Certainly, we will study that a little bit more.

Number 5, the N22 two transfer points at Roosevelt Field are using up passenger pay per ride subway transfers. Why can't bus drivers give a paper transfer because the programmed transfers don't work. They should work. I'm not sure why they're not. We need more detail there.

So, I'm going to answer this to the important who wrote it, if that happens, we need to right away the day, the time, and the bus numbers so we can investigate. That shouldn't be happening and we'll take a look at that a little more detail.

Number 6, on the N4 some city line stops
like Farmer Boulevard and Springfield Boulevard
should be kept and a free paper transfer should
be given to NYCT. Did NICE bus reach out to
MTA NYCT bus about the plan of asking to use
MTA buses.

Those stops were not removed. I'm not sure where the confusion is. Those stops are still there. There shouldn't be any transfer issue there either. Again, we'll look into it and make sure -- the Farmers and Springfield are still active stops.

Number 7, is the city line bus stop at Belmont parking being restored for Islander fans from the new stadium and for Belmont parking meets. Unfortunately, the new stop that's currently there is very far from the city line and that's ridiculous.

We'll have to look at that and see how things roll out. We have seen no real ridership yet for Belmont Park, for concerts, for events, that kind of thing, but we'll have to roll it out. Unfortunately, what was supposed to happen at that current stop, there was supposed to be an entry gate behind the

stop right below where the pedestrian overpass is going to go. I'm not sure if the developer plans to go back and add that at some point.

We'll certainly look at that, but that's maybe a coordination effort with the developer and we'll work through that.

Next page, please.

Coming to the end here, guys.

Why can't NICE bus put out a notification on Twitter app when a bus breaks down or the run is not being covered especially on routes with hourly gaps so passengers can know in real time.

So, this is something we're working through right now. It's got to go through our command center. What's happening in a lot of cases is by the time the notification goes out, the breakdown, the accident, or the detour has been cleared. So, we're trying to work out a better system to get real time out to everybody. Be patient. I think we started playing around with that idea now on a pilot basis. We have to get better at it. It's a really good point, so thank you for that input.

Why can't NICE bus automatically start

cross honoring Long Island Railroad tickets on regular parallel bus routes, like the 22, 24, 4, 6, 15, and 20G during a major, unplanned service disruption to help passengers rather than wait for Long Island Railroad to call NICE bus. Sometimes, passengers have to wait over 2 hours for the MTA to issue a declaration plan as an alternative.

That's not our decision. That is the Long Island Railroad's decision. And the reason that's there is because again, in some cases, we automatically start cross honoring and the system, Long Island Railroad, could come back online.

We really need to wait for them to give us the authorization to start. We can't unilaterally decide for the Long Island Railroad, hey, you need us.

So, they need to call and we'll respond accordingly. Again, that's not our call, but it's a good point, but it is not our call.

Number 10, how many breakdowns were there in 2022 so far on the new buses in the fleet?

So, I don't know what total 2022 has been.
This doesn't break down new buses versus old

buses. I do know for the month of March, we had 58 breakdowns. So, 58 cannot continue in service breakdowns.

Let me put that in context. We had 60,000 trips in the month of March and we had 58 breakdowns. So, a very, very tiny fraction of breakdowns where we could not continue.

Again, that's the comparison. Again, very happy -- actually, ecstatic with our rad failures. That's a standard transit KPI and we are by far outperforming most northeast systems.

Does NICE Bus have a preventative maintenance program for its newer buses.

Yes, there's a preventative maintenance program. We have to follow the preventative maintenance program in order for the buses to stay in warranty. 98 percent of our fleet is done on the preventative maintenance program on time. In other words, when it says 30,000 miles, we do it on time 97 percent of the time. So, it keeps those buses in warranty. And, again, it's a benefit to make sure that we are good stewards of the assets that the county allows us to keep on.

Number 12, would the new on-demand service be added to include areas like where the 45 and 51 used to serve? Basically, wanting to know if the on-demand service will be included specially since it's been 2 and a half miles between where the 54 and 55 and N19 service in Merrick and Bellmore.

Again, we'll continue to look at different areas to roll those out. You saw the original rollout or the first rollout. The planners are working on that right now and right behind that will be rollout number 2, 3, 4, 5, 6. And, again, it's a 24-month plan. Let's see how it goes and let's keep our fingers crossed its well accepted so.

I think that was it.

At this point, I think I'd like to take any questions of the board -- the board might have as far as current service, or projected service for the year, or anything else I talked about, I'd be happy to answer questions.

MR. CHAIRMAN: Just to comment, I think some of these public comments were quite good today and can only lead us in better service.

MR. KHZOUZ: I agree. That's great input

and we'll certainly investigate and look at all these different challenges.

I could come up with two

MR. BERSE:

things here. Number 1, you showed us on those battery buses a new design. What does it cost us to decorate these buses with the patterns that they have because I have an acquaintance who works in the yard for MTA in Queens and they say that their new decorations that Governor Cuomo mandated cost \$30,000 per bus when they altered it from the old style.

So, what does it cost us for what we're doing?

MR. KHZOUZ: The design cost us nothing, so that's a positive. This design was a function of in-house design work. So, design work cost us nothing.

The pattern and applying, this is a wrap, it's a sticker basically. The wrap doesn't cost us anything more than the design does. There is no increase cost.

MR. BERSE: And the other thing was I want to reiterate something that I've been saying for quite a long time, that I believe that some sort of universal cards be given to committee

1	members that would be willing to ride the
2	actual runs and see what some of the public is
3	talking about. And we have always liked skated
4	around this issue and never really addressed
5	it, so I want to throw it out there again.
6	MR. KHZOUZ: Yes. So, that is possible
7	certainly and we could talk offline about how
8	to get that done through an exchange afterwards
9	or in the coming days.
10	MR. BERSE: Okay, because that is the kind
11	of thing that we have always said and nothing
12	ever got accomplished. I'd like to see that
13	finally happen.
14	MR. KHZOUZ: I will make myself a note and
15	we'll follow up individually.
16	MR. BERSE: Make sure it's not a B flat.
17	MR. KHZOUZ: You've never heard me sing.
18	MR. BERSE: You never want a bus to be
19	flat.
20	MR. KHZOUZ: Any other puns? No, okay.
21	MR. BERSE: I guess I punished everybody
22	enough.
23	MR. DISILVIO: I'm glad that's on the
24	record.
25	MR. CHAIRMAN: The fact we have completed

1	the public comment and have pretty much gone
2	through the agenda, at this point I'd like to
3	address two major issues we have today. The
4	first being which is approval of the 2022 Title
5	11 Report Plan.
6	So, I'd like a member to move to make a
7	motion to adopt that Title 11 report.
8	Would anybody choose to make a motion?
9	MR. ROSARIO: Make a motion.
10	MR. DUROSEAU: I second it.
11	MR. BERSE: Good, I've been talking too
12	much. You guys did it.
13	MR. DUROSEAU: I just wanted to check my
14	volume.
15	MR. CHAIRMAN: With that, if we can get a
16	shout out, I guess it's okay. All those in
17	favor can say aye.
18	(A round of ayes.)
19	MR. CHAIRMAN: Any opposed? No opposed
20	and no abstentions.
21	Vote carries and acceptance and approval
22	of the 2022 Title 11 program plan carries.
23	Let the minutes note that accordingly.
24	Now, Mr. Khzouz, since the budget is not
25	legally finalized impospective of melitical

1	issues, and it's wonderful that service has
2	increased and that there's no fare increase,
3	I'm certainly happy, you know, as to everything
4	I've heard today.
5	However, unless you have an issue, I think
6	the proper way to take a vote today since
7	there's always a little possibility of anything
8	that we'll approve or we'll take a vote on the
9	budget on a conditional basis.
10	MR. BERSE: Just make the motion that way.
11	MR. CHAIRMAN: That's what I plan to do.
12	I'd like to make a motion to approve the
13	2022-23 financial budget proposal for
14	\$148,450,000 on a conditional basis subject to
15	approval of receipt of the STOA money.
16	Would someone move to adopt the
17	resolution?
18	MR. BERSE: Second.
19	MR. CHAIRMAN: Who made the motion?
20	MR. BERSE: You did, didn't you?
21	MR. CHAIRMAN: No, I'm asking for someone
22	to make the motion, please.
23	Mr. Berse, you made the motion.
24	Can somebody second.
25	MR. ROSARIO: Second.

1	MR. CHAIRMAN: Thank you, Mr. Rosario.
2	MR. CHAIRMAN: We'll take a vote.
3	We can do this again. I guess I could
4	call it out.
5	Mr. Berse?
6	MR. BERSE: Aye.
7	MR. CHAIRMAN: Mr. Rosario?
8	MR. ROSARIO: Yes.
9	MR. CHAIRMAN: Mr. Duroseau?
10	MR. DUROSEAU: Yes.
11	MR. CHAIRMAN: Is Mr. Benjamin on this
12	call? I see his name on the bottom of the
13	screen.
14	MR. BENJAMIN: This is son listening in.
15	MR. CHAIRMAN: Well, nice of you to listen
16	in. You can tell your dad what occurred.
17	However, unless he's present, I'm sorry we
18	cannot accept your vote. I'm sure you
19	understand that.
20	Thank you.
21	In any case, I have a vote and I vote to
22	approve the conditional budget. So, therefore,
23	the vote carries to approve the 2022 budget at
24	\$148,450,000 subject to approval by the New
25	York State budget.

1	I think that's our important issues for
2	today. Before we leave, I'll give the
3	committee one more opportunity if they have any
4	further questions before I request an
5	adjournment of the meeting.
6	I don't see anybody who has any further
7	questions.
8	With that, would someone please make a
9	motion. We'll move to make a motion to adjourn
10	our meeting.
11	MR. ROSARIO: Motion to close.
12	MR. CHAIRMAN: Mr. Rosario.
13	And second?
14	MR. DUROSEAU: I second it.
15	MR. BERSE: Third.
16	MR. CHAIRMAN: And we have that.
17	All in favor?
18	(A round of ayes.)
19	We have unanimous consent to adjourn our
20	meeting.
21	I want to thank everyone for attending.
22	Yes, we all have personal meetings and fully
23	understand what's going around now. And I
24	personally can only wish that things do improve
25	and we can all touch hands pretty soon. I want

to thank everyone for their attendance, for their comments, and participation.

Again, I think the public comments were extremely good and very astute. And I want to thank Mr. DiSilvio for helping coordinate a lot of things. Coordinating these meetings are not easy. There are a lot of people in attendance here not just the committee members. I'd like everybody to understand that. Mr. Khzouz has a lot of staff people who are involved in this. Mr. DiSilvio has a very heavy schedule with the county and to get everybody together is not easy. We had to do this way in advance before mandates were dropped, and I fully understand that, and I'd like everyone else too.

Last but not least, I'd like to thank NICE Transportation for everything they do and everything they try to do.

With that, I'd like to wish everyone a good night and thank you for attending.

MR. KHZOUZ: Thank you, everybody.

(Time noted: 6:31 p.m.)
